

— Optimum Energy

## Engineering Solutions for sustainable, scalable, and smart building problems

### Retro-Commissioning (RCx)

Reduce your energy usage through the holistic engineering review, analysis, and DDC programming modifications to all equipment on site from the central utility plant to the terminal units.

**15-25%**

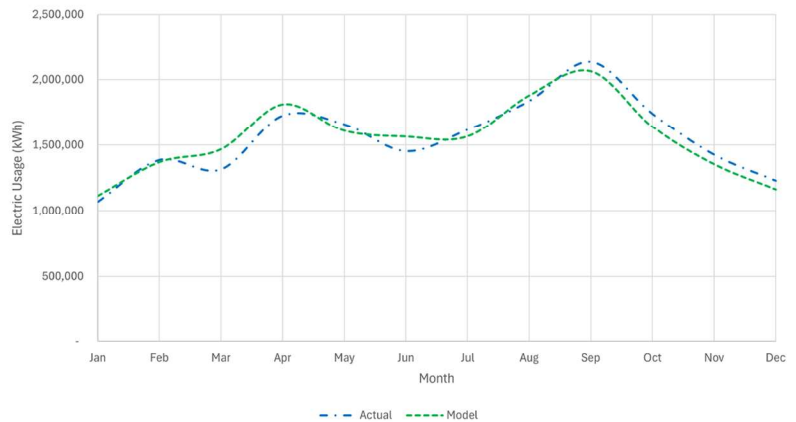

Average  
energy efficiency  
improvement

**1-2 Year**

Average  
ROI

### Measurement & Verification (M&V)

Measure, track, and prove facility performance where it matters, at the meter.

### BAS Upgrades & Long Range Planning

Achieve your facility goals through the evaluation, design, and implementation of facility improvements designed to improve operations and reduce energy usage.
